Welcome to DFUG 2017

Lisa Ondrejcek & Darryl Pahl
Welcome to DFUG 2017

• The 23rd DataFax User Group Conference
• Third DFUG in Florida
2003, Duck Key
Greetings From Florida

“The Sunshine State”

2003, Duck Key

2012, Palm Coast
2017, Orlando
2012, Palm Coast
2003, Duck Key
Hawks Cay Resort, Duck Key, March 2003
DataFax 3.6; Kayak races in the lagoon
Duck Key, September 2017: “Be patient, be safe, it may be a while”
Hawks Cay Resort September 2017: Relatively unscathed
Hammock Beach, Palm Coast, March 2012
DataFax 4.2; Magicians on the Intracoastal Waterway
Hammock Beach, Palm Coast, September 2017
“We’re fortunate. But it’s still a major event for us.”
DFUG 2016: Durban, South Africa
October 17-20
Themes at DFUG 2016

• First DFUG in Africa
  • First outside North America
• Announcement of new name: DFdiscover
• New release: DataFax 2016
  • The last release with the name DataFax
• New directions for the software
  • DFcollect, version 1.0
Training at CAPRISA
Group visit to eThekwini HIV/TB Clinic
Updates since DFUG 2016: POWER

- POWER (Prevention Options for Women Evaluation Research)
- Develop cost-effective and scalable methods for implementation of microbicides and other forms of pre-exposure prophylaxis (PrEP).
- 3,000 women
- Sites: Cape Town; Johannesburg; Kisumu
- Study duration: 3 years
- DF/Net collaboration with the University of Washington
Data collection solution: DFcollect

- Android app
- Supports offline and online data entry and bidirectional synchronization of data when online.
- DFcollect version 1.0
Visiting the Tutu Teen Tester
Cape Town
Up and Running!

• First participant enrolled this spring
• All three sites up and running
• 150 women enrolled
• 2,850 to go!
• First successful implementation of our online/offline tablet solution
Updates since DFUG 2016

New Clients
- NUIG
- AHRI
- Sanifit

New Roles
- ICRC
- SFDPH

New Partnerships
- Clindata
- BC-Biostat
National University of Ireland, Galway (NUIG)
Africa Health Research Institute (AHRI)
Sanifit

A NEW APPROACH TO CALCIFICATION DISORDERS

- San Diego biopharmaceutical company
- Study needed rescuing
- DataFax to the rescue!
International Clinical Research Center (ICRC)

- DF/Net data management client since 2003
- Now a licensed client
- Managing the POWER study

Lara Kidoguchi

PrEP

POWER
San Francisco Department of Public Health (SFDPH)

• Stay and TRIUMPH studies
• Providing PrEP to the trans and gender non-conforming community

Learn how Janet
#StaysAware
Clindata

- CRO based in Bloemfontein, South Africa
- Data management & data analytics
- Human & veterinary studies
- Partnering with DF/Net on CDISC standards within DFdiscover
BC-Biostat

- CRO based in Beijing, China
- Data management & data analytics
- Partnering with DF/Net on DM training in China
Expanding beyond “Friends & Family”

- Greater focus on marketing
- SCDM: DF/Net’s first booth
- New brochure
- New website
- New demo study
New booth
New booth
Data Management Solutions for a Better World

For over 15 years DF/Net Research has been committed to connecting people with their data. We envision a world in which data is always connected to its human sources. When data is connected to the evidence it’s based on, you can explore and question it, often gaining new insights that otherwise would have been lost.

DF/Net means Data First

Through our data management, data analytics, and hybrid data management software, we build the connections that help our global clients realize and recognize the truth in their endeavors.

The DF/Net Difference

The DF/Net difference is the human element of our work: people you can trust, and people you feel are an integral part of your team. We build long-term relationships with our clients and partners. In fact, our first client is still our client.

We have understanding and empathy for study participants, our research colleagues, and the impact of their work. Every client is different, and it’s our job to adapt our processes to make each project a success.

Our Software

DF/Net is unique in that we both develop and use DFdiscoer, our Clinical Data Management System that organizations worldwide have come to rely on. Our flexible “works anywhere, anytime, and all the time” software builds on over 25 years of use in early-phase to pivotal FDA-submission clinical trials. Our software adapts to your study needs, not the other way around.

DFdiscoer is a complete solution that includes tools for study database definition, rapid data collection, verification and cleaning, subject scheduling and compliance tracking; standard data reporting; and exports to SAS, SQL, and other systems.

Our Services

DF/Net provides high-quality, robust data management solutions based on our hybrid approach to data collection, integrating paper and electronic data capture (EDC) methodologies to meet our clients’ needs.

Our data management solutions are powered by DFdiscoer, our reliable, flexible, mature, and scalable software.

With DFdiscoer, we are able to adapt to any setting by applying the most appropriate technology and approach.

We provide highly personalized data management and analytics services based on your needs, including:
» Multi-language eCRF/CRF design following CDASH conventions
» Hybrid database development to support paper, EDC, tablet, and web
» Full data management and data analytics services
» Support and training

Our software is developed, maintained, and supported by a company whose quality processes are ISO 9001:2015 certified and FDA 21 CFR Part 11 compliant.
